

AMENDMENTS TO THE CLAIMS

Claim 1. (Original)

A tissue container comprising a tissue receiving enclosure and a re-closable opening for dispensing tissues there through, and an associated auxiliary compartment, holding a preparation for use in conjunction with the tissues.

Claim 2. (Original)

A tissue container according to claim 1, wherein the auxiliary compartment is attached to, integral with, or loosely received within the container.

Claim 3. (Original)

A tissue container according to claim 1, wherein the tissue receiving enclosure holds a plurality of moistened tissues and where the opening is fitted with a dispenser for dispensing one tissue at a time.

Claim 4. (Original)

A tissue container according to claim 3, wherein the auxiliary compartment is integral with or attached to the dispenser.

Claim 5. (Original)

A tissue container according to claim 4, wherein the dispenser comprises a tissue dispensing opening fitted with a re-closable first lid and a re-closable auxiliary compartment.

Claim 6. (Original)

A tissue container according to claim 5, wherein the auxiliary compartment is fitted with a re-closable second lid.

Claim 7. (Original)

A tissue container according to claim 6, wherein the second lid is pivotally hinged to the first lid.

Claim 8. (Original)

A tissue container according to claim 6, wherein the first lid and the second lid are hinged to the dispenser about pivot hinges parallelly extending.

Claim 9. (Original)

A tissue container according to claim 8, wherein the first lid and the second lid are hinged to the dispenser adjacent opposite edges of the dispenser.

Claim 10. (Original)

A tissue container according to claim 5, wherein the auxiliary compartment is formed in said first lid and is closable by a re-sealable foil.

Claim 11. (Original)

A tissue container according to claim 5, wherein the auxiliary compartment is formed in said first lid and is re-closable by a detachable cover.

Claim 12. (Original)

A tissue container according to claim 11, wherein the auxiliary compartment is formed at an inside face of the first lid.

Claim 13. (Original)

A tissue container according to claim 11, wherein the auxiliary compartment is formed at an outside face of the first lid.

Claim 14. (Original)

A tissue container according to claim 1, further comprising a tissue dispenser formed with a tissue dispensing opening and a receptacle constituting the auxiliary compartment; and a re-closable first lid for closing the dispensing opening, and the auxiliary compartment.

Claim 15. (Original)

A tissue container according to claim 14, wherein the auxiliary compartment is fitted with a second sealingly re-closable second lid.

Claim 16. (Original)

A tissue container according to claim 14, wherein the tissue dispensing opening and the auxiliary compartment are coaxial.

Claim 17. (Original)

A tissue container according to claim 14, wherein the auxiliary compartment is an annular groove.

Claim 18. (Original)

A tissue container according to claim 14, wherein the container is cylindrical and has a longitudinal axis coaxial with the tissue dispensing opening and the auxiliary compartment.

Claim 19. (Original)

A tissue container according to claim 6, wherein one or both of the first lid and the second lid are biased to spring-open.

Claim 20. (Original)

A tissue container according to claim 6, wherein one or both of the first lid and the second lid are fitted with a snap-type closing mechanism.

Claim 21. (Original)

A tissue container according to claim 5, wherein one or both of the tissue dispensing opening and the auxiliary compartment are pre-sealed with a foil.

Claim 22. (Original)

A tissue container according to claim 1, wherein the auxiliary compartment comprises one or more receptacles fitted to or formed at a bottom of the tissue container.

Claim 23. (Original)

A tissue container according to claim 1, wherein the auxiliary compartment is re-sealable by a foil adherable to boundaries of the auxiliary compartment.

Claim 24. (Original)

A tissue container according to claim 1, wherein the auxiliary compartment comprises several receptacles, each receptacle being independently closable.

Claim 25. (Original)

A tissue container according to claim 1, wherein the auxiliary compartment has a finger-scoopable cross-section.

Claim 26. (Original)

A tissue container according to claim 1, wherein the auxiliary compartment is removably received within a tissue receiving enclosure of the container.

Claim 27. (Original)

A tissue container according to claim 1, wherein the container is a soft-pack.

Claim 28. (Original)

A tissue container according to claim 1, wherein the container is rigid.

Claim 29. (Original)

A tissue container according to claim 1, wherein the container is portable.

Claim 30. (Original)

A dispensing cover for a tissue container, said cover comprising a tissue dispensing opening and a receptacle constituting an auxiliary compartment; and a re-closable first lid for closing the dispensing opening.

Claim 31. (Original)

A dispenser cover according to claim 30, wherein the auxiliary compartment is fitted with a sealingly re-closable second lid.

Claim 32. (Original)

A dispenser cover according to claim 30, wherein a longitudinal axis of the tissue dispensing opening and the auxiliary compartment is coaxial with a longitudinal axis of the tissue container.

Claim 33. (Original)

A dispenser cover according to claim 31, wherein one or both of the first lid and the second lid are biased to spring-open.

Claim 34. (Original)

A dispenser cover according to claim 31, wherein one or both of the first lid and the second lid are fitted with a snap-type closing mechanism.

Claim 35. (Original)

A dispenser container according to claim 31, wherein one or both of the tissue dispensing opening and the auxiliary compartment are pre-sealed with a foil.

Claim 36. (Original)

A dispenser container according to claim 31, wherein the auxiliary compartment is re-sealable by a foil adherable to boundaries of the auxiliary compartment.

Claim 27. (Original)

A dispenser container according to claim 31, wherein the auxiliary compartment comprises several receptacles, each receptacle being independently closable.

Claim 38. (Currently Amended)

A dispenser container according to claim 31, wherein the auxiliary compartment has a finger-scoopable cross-section. ~~wherein the auxiliary compartment has a finger-scoopable cross-section.~~

Claim 39. (Original)

A compartment for receiving a preparation for use in conjunction with a tissue, said compartment being an auxiliary compartment included with or attached to a tissue container.

Claim 40. (Original)

A compartment according to claim 39, wherein said auxiliary compartment is integral with a tissue dispenser attached to the container.

Claim 41. (Original)

A compartment according to claim 39, wherein said auxiliary compartment is adhered to an outside face of the container.

Claim 42. (Original)

A compartment according to claim 39, wherein said auxiliary compartment is receivable within a tissue receiving enclosure of the container.

Claim 43. (Original)

A compartment according to claim 39, comprising a base portion adapted for detachable engagement with a base portion of a tissue container.

Claim 44. (Original)

A compartment according to claim 43, wherein said base portion is fitted for engagement with a base of a cylindrical tissue container.
